Notes / Observations / Tools Used / Etc..
 Initial soak seems to be loosening the dirt up, but not anything major. So I changed the solution to make it fresh, and left it at 100%.

Notes / Observations / Tools Used / Etc..
 This TSP seems to loosen the dirt up.. But not anymore than the Olive Oil does. My guess is that the toothbrush and brass cleaning brush are again doing most of the work here... no solution change. Using the same stuff that was in since the last solution change.

 Scrub, Brush, repeat. Will give TSP until Thanksgiving too. Still have dirt coming off, and it seems to be loosening the dirt well. But as well as Olive Oil and Distilled Water. We'll give it some more time and see if that changes at all.

 No change in the solution. Seems to be softening the coating really well. It is coming off fairly well. I'll change the solution on the next interval.

 We'll TSP seems to be taking the dirt off okay. Changed the solution and we'll see if that help a little more. Otherwise same ole brushing and scrubbing.
